## **PREPAGE**

The Agriculture section is one of the main sections of the Directorate of Economics & Statistics Department. It is responsible for the collection, compilation, analysis and presentation of agriculture statistics in the State. The agriculture statistics covers the statistics of crop area, production and productivity of food and non-food crops grown in the State. The statistics on Land Use and Irrigation Statistics are also compiled and released by the Directorate of Economics & Statistics.

The estimation of final Yield Data of all the crops covered under CCE (Crop Cutting Experiment) is another main activity of this Directorate. The primary objective of GCES is to obtain fairly reliable estimates of average yield of principal crops of the State. Presently, the DES is conducting CCE on thirteen crops using the methodology developed by the IASRI (Indian Agricultural Statistics Research Institute), Pusa. The payment of the crop insurance at the time of crop failure due to natural calamities, etc. is made on the basis of the CCE results. The CCE is an effective mechanism for the collection of reliable data from the grass root level and immensely facilitate in policy formulation for various development programme in agriculture sector.

**The Handbook on Area, Production and Yield of Principal Crops in Meghalaya, 2019** is the fifth in the series. It presents key statistical data on agriculture statistics of the State like APY (Area, Production and Yield) of principal crops of the State, Land Use Statistics and Irrigation Statistics for the year 2013-14 to 2017-18. The data presented in this publication are based on the reports approved by the State Level Crop Statistics Report Committee.

I hope the report will be helpful for the policy makers, economists, researchers, different Government and Non-Governmental Organizations working in the Agriculture sector of the State. Suggestions for improving the quality and coverage of the Handbook are most welcome.
