

Price Bulletin

2025

18th Annual Edition

PRICE BULLETIN

2025

18TH ANNUAL EDITION

**GOVERNMENT OF MEGHALAYA
DIRECTORATE OF ECONOMICS AND STATISTICS
MEGHALAYA, SHILLONG**

Price Bulletin 2025 is the 18th annual bulletin brought out by the Directorate of Economics & Statistics, Meghalaya, Shillong. The main objective of the Price Section of the Directorate is to collect primary data, compile and publish the data in the form of Price Bulletin so as to enable the report to be made available to the public from time to time. The Price Bulletin is a publication containing the monthly average retail prices of both urban and rural centres which has been identified for price collection. In addition, the annual average changes in the price of 21 select commodities are regularly computed for every five years (percentage increase over the previous year). In this publication, the years 2020-2021 could not be computed due to the pandemic and hence the data is not reflected in the table. Therefore, the data gap of two years has shown abnormal increase and decrease of price data as the percentage increase/decrease is not over the previous year but of three years i.e., 2019.

The Price Bulletin which is published in the year 2026 contains the Wholesale and Retail Prices of urban and rural price centres of the year 2025. In addition, the data on Consumer Price Index for Industrial Workers, Consumer Price Index for Agricultural and Rural Labourers and Consumer Price Index for Urban, Rural and Combined is also incorporated in the bulletin. The Price Bulletin of 2025 has been compiled by the staff of the Price Section of the Directorate based on the reports provided by the field staff posted in different districts and C & RD Blocks of the state.

I would like to express my appreciation to the Price Section of the Directorate under the supervision of the Research Officer for their tireless diligence in the preparation of this bulletin.

I hope that this bulletin will be of immense use to policy makers, planners and researchers and others who are interested in knowing the price trend of certain commodities in the state.

Lastly, suggestions for improvement of the quality and contents of the publication would be welcomed and highly appreciated.

Smt. A.M. Laloo
Director
Economics and Statistics
Meghalaya, Shillong

**OFFICERS AND STAFF OF THE DIRECTORATE ASSOCIATED
WITH THE PUBLICATION OF THE PRICE BULLETIN 2025**

Price Statistics serve as a key indicator of the changes in the general price level of goods and services in the state. The data on price statistics reflects the economic situation of the state and thus plays an important role in the policy decision of the Government. Such policies influence the economic growth and development of the state.

The Directorate of Economics and Statistics regularly collects and compiles wholesale and retail price data on food and non-food items. Wholesale prices are collected from identified price centres in the seven district headquarters of the state while Retail prices are collected from both the district headquarters and rural price centres. The task of price collection is carried out by staff of the Directorate in the District Offices and by the Sub-Inspector of Statistics posted in the Community and Rural Development Blocks of the state. The monthly average for each centre is computed from the weekly and monthly price returns.

The following are the price data collected and maintained by the Directorate which are incorporated in this publication: -

1. **Wholesale Prices:** - Wholesale prices on food and non-food items in Meghalaya are collected from 7 (seven) Urban Centres namely Shillong, Jowai, Nongstoin, Nongpoh, Tura, Williamnagar, and Baghmara. Food items are collected on weekly basis while non-food items are collected on monthly basis.
2. **(i) Retail Prices (Urban):** - Retail prices of food and non-food items for urban areas are also collected from the 7 (seven) Urban Centres namely Shillong, Jowai, Nongstoin, Nongpoh, Tura, Williamnagar, and Baghmara. The price data are collected on weekly basis for food items including non-food items under heading II (A) Fuel and Lighting and (B) Pan, Tobacco, etc. Other non-food items are collected on monthly basis.
- (ii) Retail Prices (Rural):** - Retail prices of food items for rural areas are collected on a weekly basis and prices of non-food items are collected on a monthly basis from 24 selected centres spread across the state, namely, Ladrymbai, Amlarem, Ummulong, Umsning, Byrnihat, Mawngap, Mawryngkneng, Mawsynram, Pynursla, Sohra, Mairang, Mawshynrut, Mawkyrwat, Mendipathar, Rongjeng, Rongsak, Songsak, Chokpot, Rongara, Barenggapara, Dadenggre, Phulbari, Rongram and Betasing.

The data collected by the price collectors from the urban and rural centres, in a prescribed format prepared by the Directorate, is sent to the Price Section of the Directorate for compilation. The compiled data is further broken down into monthly and annual retail and wholesale averages and is published as a Price Bulletin annually. This Price Bulletin may be used by Research Scholars, Line Departments and other stakeholders for analysis and research. Furthermore, the price data which is available with the Directorate is shared with the Army, other defense services and suppliers/contractors on request as per their requirements.

3. **(i) Consumer Price Index for Industrial Workers:** Consumer Price Indices for Industrial Workers which is compiled by the Labour Bureau, Govt. of India, is used for regulation and determination of Dearness Allowance (DA) for Central and State Government Employees and for Revision/Fixation of Minimum Wages for different categories of labourers in the State with 2016 as the base year. The monthly All India indices are used for calculation of Dearness Allowance (DA) and Minimum Wages. The current All India indices is converted to the Old Base and the converted data is sent to Pay Revision and Labour Commissioner every 6 (six) months and to MeECL on their request.

(ii) Consumer Price Index for Agricultural and Rural Labourers: The Consumer Price Indices for Agricultural Labourers and Rural Labourers released every month by the Labour Bureau, Chandigarh are compiled and presented in this Price Bulletin. The Base Year for Consumer Price Indices for Agricultural Labourers and Rural Labourers is 2019.

(iii) Consumer Price Index for Rural, Urban and Combined: The Consumer Price Indices for All-India and States/UTs separately for Rural, Urban and Combined is being compiled by the National Statistical Office, Ministry of Statistics and Programme Implementation. The Consumer Price Index (Combined) is used for measuring inflation on a monthly basis (inter-period/inter-region price variation) with a significant lag. The Base Year for Consumer Price Index for Rural, Urban and Combined has been revised from 2012 to 2024. The monthly indices for Rural, Urban and Combined for Meghalaya and other North Eastern States and All-India have also been presented in this bulletin.

The price data as shown in the Price Bulletin are averages of prices collected from different identified centres on a weekly and monthly basis and does not reflect the actual price while centre wise prices are available in the Directorate. Therefore, discretion should be applied while comparing the data in this bulletin. In retrospect, the price data of the commodities only shows the price trends over a period of time and should not be construed as the actual price of the commodities.

There are centres where prices reported only 10 to 15 items out of the total 31 items of the Weekly Wholesale Prices for food and 5 to 7 items for non-food items for certain periods as the items were unavailable due to seasonality, infrastructural issues, unwillingness on the part of the sellers to quote/disclose the price of commodities and so on. In addition, prices that are collected in the rural areas are only retail prices while wholesale price centres are collected only from the identified district headquarters of the state.

There are other limitations pertaining to price collection such as lack of sufficient manpower, changes of the market days on a weekly basis especially in the Khasi-Jaintia Hills region and lack of robust data sharing mechanism.
